

Problem

The table below gives the results of a braking test.

Test No.	1	2	3	4
Speed (kph)	33	49	65	79
Braking distance (m)	5.30	14.45	20.21	38.45

Use the relationship between speed and braking distance to estimate the braking distance required for a vehicle traveling at 55 kph.

A hand-drawn scatter plot of these data points suggest a linear relationship. The calculator uses the least squares method to find the line of best fit, $y=ax+b$, for data entered in lists.

<input type="button" value="data"/> <input type="button" value="data"/> <input type="button" value="⊖"/> <input type="button" value="⊖"/> <input type="button" value="⊖"/>	DEG FORMULA 1:Clear L1 2:Clear L2 3:Clear L3 4:Clear ALL

3 (Selects 2-Var Stats) <input type="button" value="⊖"/> <input type="button" value="⊖"/> <input type="button" value="⊖"/>	DEG 2-VAR STATS XDATA: L1 L2 L3 YDATA: L1 L2 L3 FREQ: None L1 L2 L3 <input type="button" value="CALC"/>
<input type="button" value="enter"/>	DEG 2-Var:L1,L2 1:n=4 2:x̄=56.5 3:Sx̄=19.89137166
Press <input type="button" value="⊖"/> as necessary to view a and b.	DEG 2-Var:L1,L2 $\hat{x}\hat{y}=5234.15$ $a=-0.6773251896$ $b=-18.66637321$

This line of best fit, $y' = 0.67732519x' - 18.66637321$ models the linear trend of the data.

Press \blacktriangleleft until y' is highlighted.

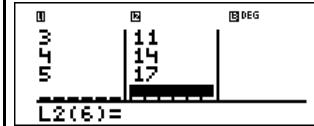

enter 55 **)** **enter**

The linear model gives an estimated braking distance of 18.59 meters for a vehicle traveling at 55 kph.

Regression example 1

Calculate an $ax+b$ linear regression for the following data:
 $\{1,2,3,4,5\}; \{5,8,11,14,17\}$.

Clear all data	data data \blacktriangleleft \blacktriangleleft \blacktriangleleft	
Data	enter 1 \blacktriangleleft 2 \blacktriangleleft 3 \blacktriangleleft 4 \blacktriangleleft 5 \blacktriangleleft enter 5 \blacktriangleleft 8 \blacktriangleleft 11 \blacktriangleleft 14 \blacktriangleleft 17 enter

Regression example 2

Calculate the exponential regression for the following data:

$$L1 = \{0, 1, 2, 3, 4\}; L2 = \{10, 14, 23, 35, 48\}$$

Find the average value of the data in L2.

Compare the exponential regression values to L2.
