WE ARE RECRUITING!

GESlab
Geomodeling for Earth Sustainability

PhD/Master Students

You are welcome to develop your work in any of the following topics:

- ✓ AI/Machine learning on global natural hazard assessments
- ✓ Remote sensing data processing
- ✓ InSAR processing
- ✓ Cloud computing and infrastructure for stimulations
- ✓ Induced seismic analysis
- ✓ Advanced geofluid/crust modeling
- ✓ Reservoir modeling of Oil/Gas and Geothermal Systems
- ✓ Complex fault modeling for global earthquake response

PI: Jay Tung, PhD

Geophysics

Remote Sensing
