"Excellence in education since 1889"

9/1/2021

To: Dr. Tommy Dang, Texas Tech University

Dear Dr. Dang,

This letter is to thank you for an extraordinarily well prepared and delivered colloquium talk given at our department on 9/1/2021. I found your work to be a refreshing blend of familiar classic visualization techniques along with many modern extensions and improvements in scalability. The challenges in making multidimensional data accessible and understandable are formidable, even when the tools will be used by trained specialists. I look forward to seeing what you accomplish in future.

Sincerely,

Clinton L. Jeffery, Ph.D.
Professor and Chair
Department of Computer Science and Engineering
New Mexico Institute of Mining and Technology
